ABOUT US

**FUTURES
AGRIBUSINESS**

FAGRIB LLC, African and USA-based privately-owned agribusiness company operating across Africa. 35 years' experience with agribusiness projects in Africa, Great Green Wall programme

CARBON EQUITIES
NEW ZEALAND LIMITED

New Zealand privately-owned carbon credit brokers and consulting company. 18 years' experience with New Zealand Emissions Trading Scheme, 8 years as carbon brokers

Secure Sustainability

New Zealand privately-owned sustainability consulting company. 35 years' international experience with the global multi-disciplinary GreenXperts Network.

These three companies comprise [African High Integrity Carbon Partners](#)

EQUITIES TRADED

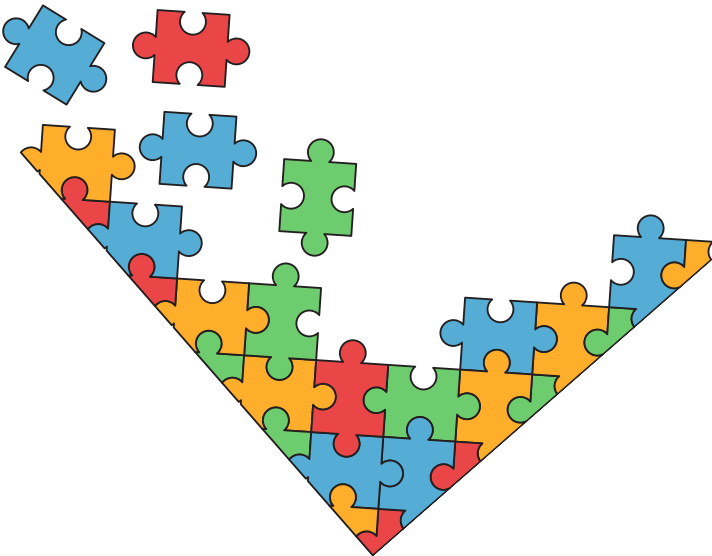

- **BOID™** - Biodiversity Credits from full species replanting and restoration of denuded habitats
- **BCC™** - Blue Carbon Credits from marine or freshwater environments
- **VCCW™** - Voluntary Carbon Credits from wetlands and peatlands
- **VPCC™** - Voluntary Protective Carbon Credits from Pre-1990 forests
- **VRCC™** - Voluntary Restorative Carbon Credits from Post-1990 forests
- **VVCC®** - Voluntary Vintage Carbon Credits from Pre-1990 forests
- **VCPT™** - Voluntary Carbon Credits from nature-based proven technologies, eg. solar and wind power

BENEFITS OF OUR OFFER

1. Long term supply of high integrity credits
2. Forward contracts minimise carbon costs by fixing future credit prices
3. Eliminates legal, reputational, and fiscal risks related to decarbonisation efforts
4. Provides social and reputational capital boost by being involved in:
 - a. Restoring and protecting critical carbon sinks
 - b. Restoring and protecting priceless species and habitats
 - c. Helping to prevent the further deforestation of the Congo and other African forests
 - d. Helping to alleviate poverty in needy communities through long term job creation
 - e. Helping create intergenerational benefits for Least Developed Country children and grandchildren to come

TRANCHE SUMMARY - AFRICA

FOREST	LOCATION	STATUS	ANNUAL CREDITS
Baies de Loza	Madagascar	LOA pending, Authentication underway	340,351
Bealanana	Madagascar	LOA pending, Authentication underway	478,345
Businga	Democratic Republic of Congo	LOA held, Authentication underway	972,132
Delta de Tsiribihina	Madagascar	LOA pending, Authentication underway	255,897
Kotakoli	Democratic Republic of Congo	LOA held, Authentication underway	662,574
Lokoho	Madagascar	LOA pending, Authentication underway	160,316
Marojejy	Madagascar	LOA pending, Authentication underway	324,312
Nosy Lava & Nosy Ilanga	Madagascar	LOA pending, Authentication underway	316,544
TOTAL			2.691,775

TRANCHE SUMMARY - NEW ZEALAND

FOREST	LOCATION	STATUS	SINGLE ISSUE CREDITS
Ararimu	New Zealand	Authentication pending	4,000
Fairhill	New Zealand	Authenticated	140,000
Hidden Valley	New Zealand	Authentication pending	13,820
Inangahua	New Zealand	Authentication pending	33,400
Kaitawa	New Zealand	Authentication pending	21,500
Maroa	New Zealand	Authentication pending	55,800
Mount Alford	New Zealand	Authentication pending	24,000
Waitotara Valley Close	New Zealand	Authentication underway	156,600
Waiwhero	New Zealand	Authentication pending	17,400
Wharetoto	New Zealand	Authentication pending	34,740
TOTAL			501,260

KEY DETAILS

1. All credit quantities stated are estimates ('est'), except for authenticated Fairhill Forest yield
2. Uncertainty on African forest estimates is $\pm 30\text{-}50\%$ depending on specific ecosystem type
3. Uncertainty on New Zealand forest estimates is $\pm 20\%$
4. Monte Carlo simulations have not been attempted
5. "Proxy LOA" label - as a developed country New Zealand is not permitted to issue LOAs under Article 6 of the Paris Climate Agreement 2015. In 2018 the Ministry for Primary Industries in New Zealand confirmed that voluntary credits issued from the Rarakau voluntary carbon research project were not counted as part of New Zealand's NDC, effectively giving the Rarakau credits "Proxy LOA" status. Voluntary carbon credits have been sold from the Rarakau forest on this basis. The RENA™ 2.0 Scheme uses a methodology similar to Rarakau and so it is reasonable to assign a similar "Proxy LOA" status to RENA™ credits
6. "Authentication underway" in African forests means that principal photography, drone scout missions, stratified sampling plot planning, ecosystem profiling, field team assignment, community needs assessment and master planning is underway for input into the Verification Report
7. "Authentication underway" in New Zealand forests means that carbon forest professionals have been contracted to complete forest plot carbon counts for the Verification Report
8. Dr Mona Wells PhD, Schrödinger Prize 2011, former Climate Director at Texas State University, will supervise independent validation reporting
9. Carbon credit allotments pending authentication are offered in good faith. Where authentication shows greater yields than estimated, the buyer will have first option to those extra units. Where yields are less than estimated, Carbon Equities New Zealand Limited will provide additional units from the African or New Zealand credit pool
10. RENA™ 2.0 Scheme meets and exceeds all scientifically-based market criteria for high integrity carbon credits

[Tranche 2026.1.Q3](#)

TERMS AND CONDITIONS

Definitions:

1. AFMA means Australian Financial Markets Authority.
2. CDP means Community Development Plan.
3. ITMO means an Internationally Transferable Mitigation Outcome. Once carbon credits have passed authentication under the standards (eg. ISO 14064-2 (2019) and ISO 14064-3 (2019)) specified by the Sovereign Government in a LOA, the Government will then register them with the United Nations as Article 6 ITMO's.
4. LDC means Least Developed Country.
5. LOA means a Letter of Authorisation issued by a Sovereign Government under Article 6 of the Paris Climate Agreement 2015. Once credits have passed authentication under the standards specified by the issuing Sovereign Government in the LOA, the Government will then register them with the United Nations as Article 6 ITMO's.
6. NDC means Nationally Determined Contribution declared by a nation under the Paris Climate Agreement 2015.
7. Preliminary Rating is the expected credit quality rating for a project to be finalised following authentication.
8. Proxy LOA means credits issued in New Zealand using an authentication process similar to or the same as the New Zealand Government Rarakau model.

Terms & Conditions:

- Tranche 2026.1.Q3 "the Offer"
- Spot credit offer Fairhill Forest for immediate purchase
- Forward contracts negotiable on price, payment and delivery dates
- Issue date 2027, volume per annum only in this Offer
- Issue dates 2028-2032 available in future offers
- Trading Currency \$USD
- Payment shall be made by direct credit in \$USD to Carbon Equities New Zealand Limited's nominated \$USD bank account
- [Trading Contract Link](#)
- Compulsory Audit Trial observed to AFMA standards
