AFCEX - High Integrity Credits Only

Introducing Us...

The **African High Integrity Carbon Partnership** is a result of an approach by Futures Agribusiness LLC to GreenXperts Limited on a joint project to bring a High Integrity Carbon Market offering to Africa

Jean A T Djiague
Lead - Africa

Jean Augustin Tsafack Djiague is our Africa Lead. He has 17 years experience in Africa. Jean appreciates the practical challenges faced by actors in the African agribusiness chain.
[LinkedIn](#)

Maurice Tange
Business Development

Maurice Tange is our Business Development Lead. He has worked with Jean throughout Africa and deeply understands the unique factors affecting business in Africa

Susan Harris
Lead Scientist & Carbon Broker

Susan is an internationally-recognised sustainability expert. She has 17 years' experience with the New Zealand Emissions Trading Scheme's science and economics since its inception in 2008. [LinkedIn](#)

Our Capabilities

The **African High Integrity Carbon Partnership** brings together the proven expertise and skills of the partners in agribusiness, sustainability, carbon markets and technology to help the African Union efficiently create a High Integrity Carbon Market for Africa

Lead – Africa

Futures Agribusiness LLC, based in the USA, has a solid track record bringing robust agribusiness projects to Africa. They combine state-of-the-art approaches and technologies crafted to serve the needs of the peoples of Africa. They are our Lead Africa project managers and liaison officers

Science & Technology

GreenXperts Limited is a New Zealand-based environmental services company focused on excellence and innovation. We are dedicated to helping solve pressing environmental problems with the very latest in science and technology. We operate globally

Carbon Marketing & Brokerage

Carbon Equities New Zealand Limited is an environmental equities investment company. We source, examine, audit and structure genuine biodiversity, compliance, and voluntary carbon credit investments. We host an International Registry of High Integrity Credits for buyers and sellers of genuine credits

Our Offering

Science

Proven credit authentication system and quality ratings for nature and non-nature projects compliant with international standards

Systems

Established credit authentication and sales platforms

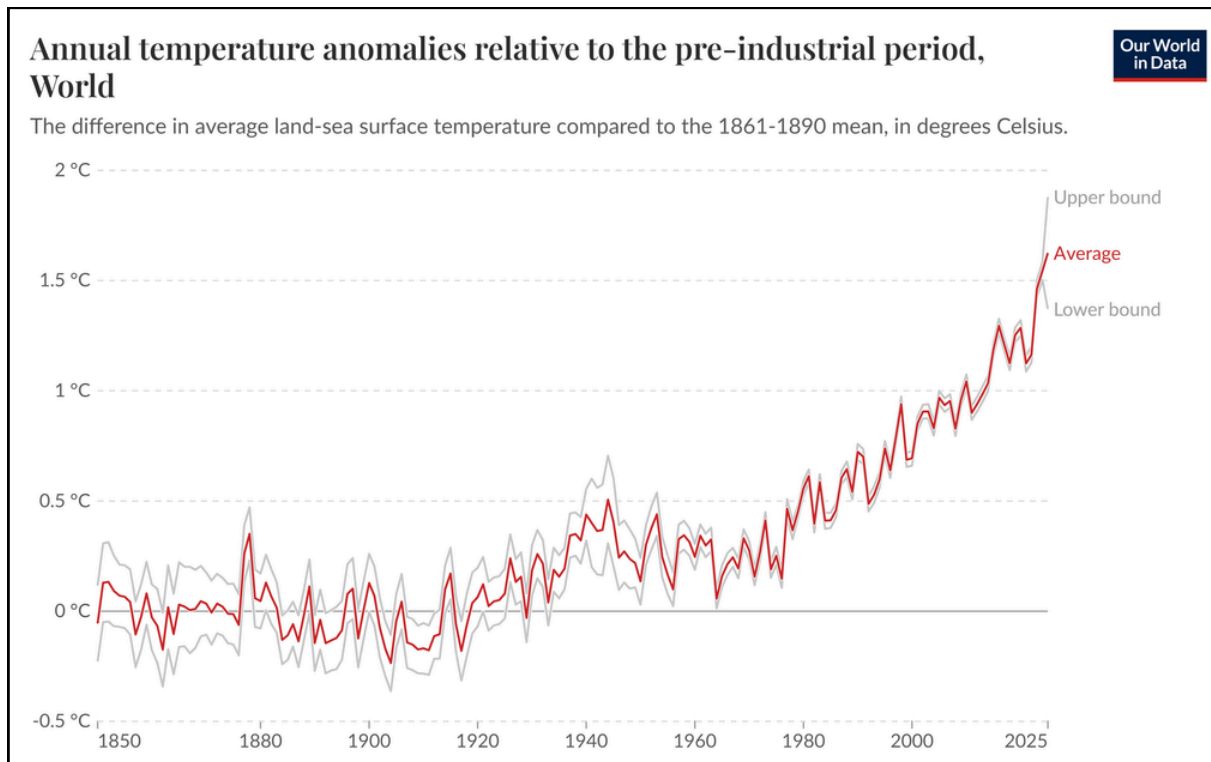

Sales

Create global sales platform for Africa based on the proven high integrity New Zealand Emissions Trading Scheme and carbon market model

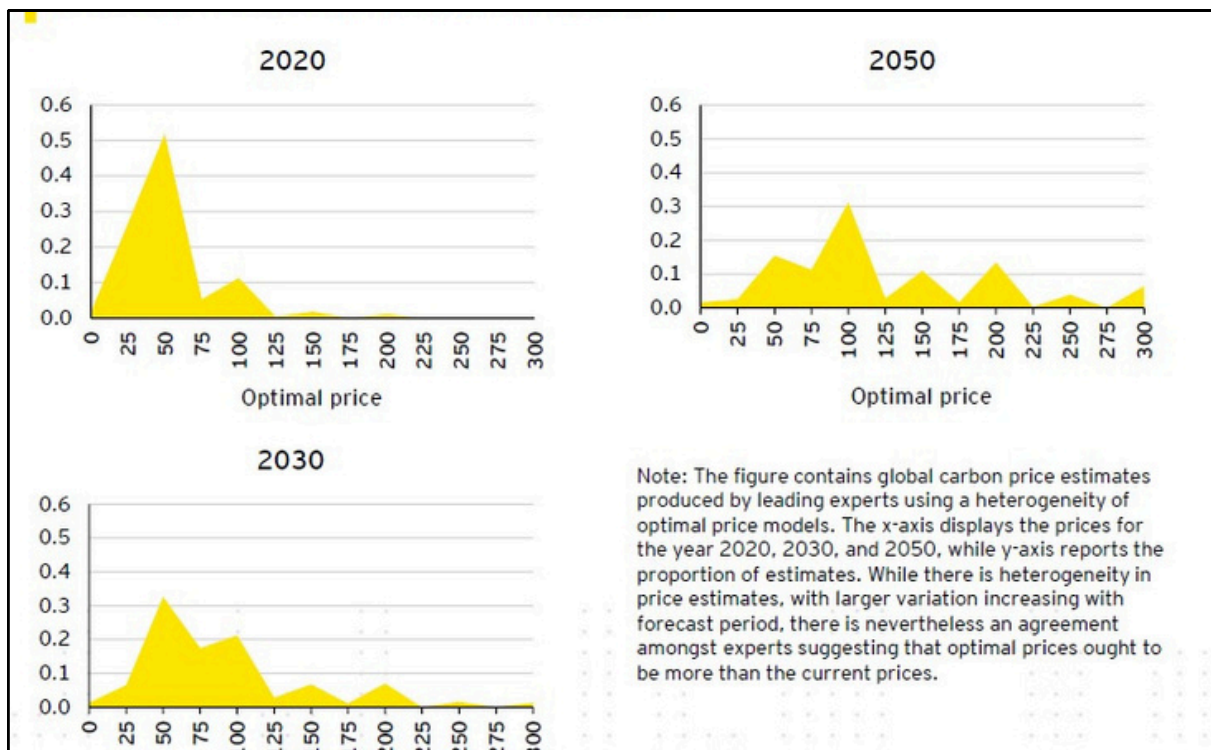

Sustainability

Compulsory inputs and revenue benefits for local communities and government authorities, working in partnership on a 100 year sustainable plan basis

Global Context

Estimated Global Carbon Prices \$USD: Ernst Young 2024 - Chart 2

Global Warming over 1.5°C

World temperatures have risen above the dangerous climate change limit of 1.5° C, assuring further disasters

World Energy Balance Changing

World energy production balance is changing to clean energy. Fossil fuel prices falling due to overproduction, (latest report), industry lobbying at saturation levels

Net Zero Commitments Incomplete

Most nations are behind in their Net Zero targets, eg. New Zealand is 84M tonnes short of its 2030 target. Contrast significant net zero activity amongst global corporates

Insufficient Genuine Credit Supply

Placing price pressure on national and corporate budgets and net zero targets. High integrity credits emerging, also dubious 'carbon capture' projects, price tensions

Credibility

Bad track record - fake credits issued

Scaling

Large potential but scaling difficult

Expertise

Lack of science and technical knowledge

Delivery

Funds often not fairly delivered to community

PROBLEMS

**Key barriers to African
biodiversity and carbon
credit trading**

OUR SOLUTION Part I

1. AFCEX 1.0 PLATFORM

- Customise from established, proven high integrity platform with key features already on board:
 - Project Portal, Authentication, Rating
 - Community Development Plan - outlines and monitors use of funds
 - Credit Sales - authenticated sell direct or by auction; Pending (Pre-Pay); Shop online
- Create centralised Live Trading Board at the African Union in Addis Ababa, Ethiopia
- Compliant with UNFCCC and ICVCM

OUR SOLUTION Part II

2. TRAINING: Train taskforce from local community and African nations as:

- Project Developers
- Project Authenticators, Auditors
- Credit Brokers
- Project Managers - Community Development

3. REVENUE SHARE
60-10-10-10-10

Build From Existing Platform

include current African systems where practical

Demonstration Platform Link

1. Create

Carbon credit issue modelled on successful New Zealand Emissions Trading Scheme. Biodiversity credits on UK standard.
Join Online Link

2. Verify

Verification by suitably qualified party to ISO 14064-2 or other accepted methodology. Discredited methods not allowed.
Example Link

3. Validate

Verification by other suitably qualified party to ISO 14064-3 or other accepted methodology. Discredited methods not allowed.
Example Link

4. Rate

Independent rating system AAA+ to C. Forest ratings based on forest ecosystem type, health, age and protection period.
Rating Link

5. Sell

Direct to buyer or broker, by auction or online sales. Links to:
Authenticated Credits
(immediate sale)
Pending Credits
(pre-pay)

AFCEX Key Features

Start Now

An African Carbon Exchange could start now with the creation of a high integrity platform AFCEX 1.0 within six months of commission (excluding Live Trading Board). Up to 200 projects

Project Developers

Guideline Template provided for Project Developers. Projects loaded on-line. Checked against reliable verification and validation standards. Corrective actions advised if needed

Project Authentication & Rating

Credits verified and validated, Green Tick® authentication where valid, rated AAA+ to C, and then listed for sale. Sale categories: Compliance (C) | Voluntary (V) | Article 6.2 (A)

Credit Sale Programmes

Promotion of credit tranches in two classes - authenticated and pending (pre-pay). Direct sales to buyers or brokers. Quarterly auctions. Live AFCEX Trading Board created

Community Development Plans

Compulsory Community Development Plan required for each project. Sets out how sale proceeds will be used. Annual monitoring and auditing

Live Trading Board

Training Programme

Call for Assistance – Advisory Body

We can help gather together an Advisory Body of international and African professionals in the field of biodiversity and carbon credit management using FAGRIB's and GreenXperts' Global Network

Create African Carbon Training Taskforce

Consult with the nations and communities of Africa to create a taskforce of people for training drawn from every interested community and relevant government authority. Taskforce to be coordinated locally

Create Training Programme

Create multi-level Training Programme for Project Developers, Authenticators, Auditors, Liaison contacts, Community Project Managers, Brokers and Auditors with set objectives, key performance criteria, and timeframes

Deploy Training Programme

Consult with local communities on how best to deploy the Training Programme across Africa. Consider all options, including local workshops, conferences, college and university courses, on-line training. Train a group of trainers to train others

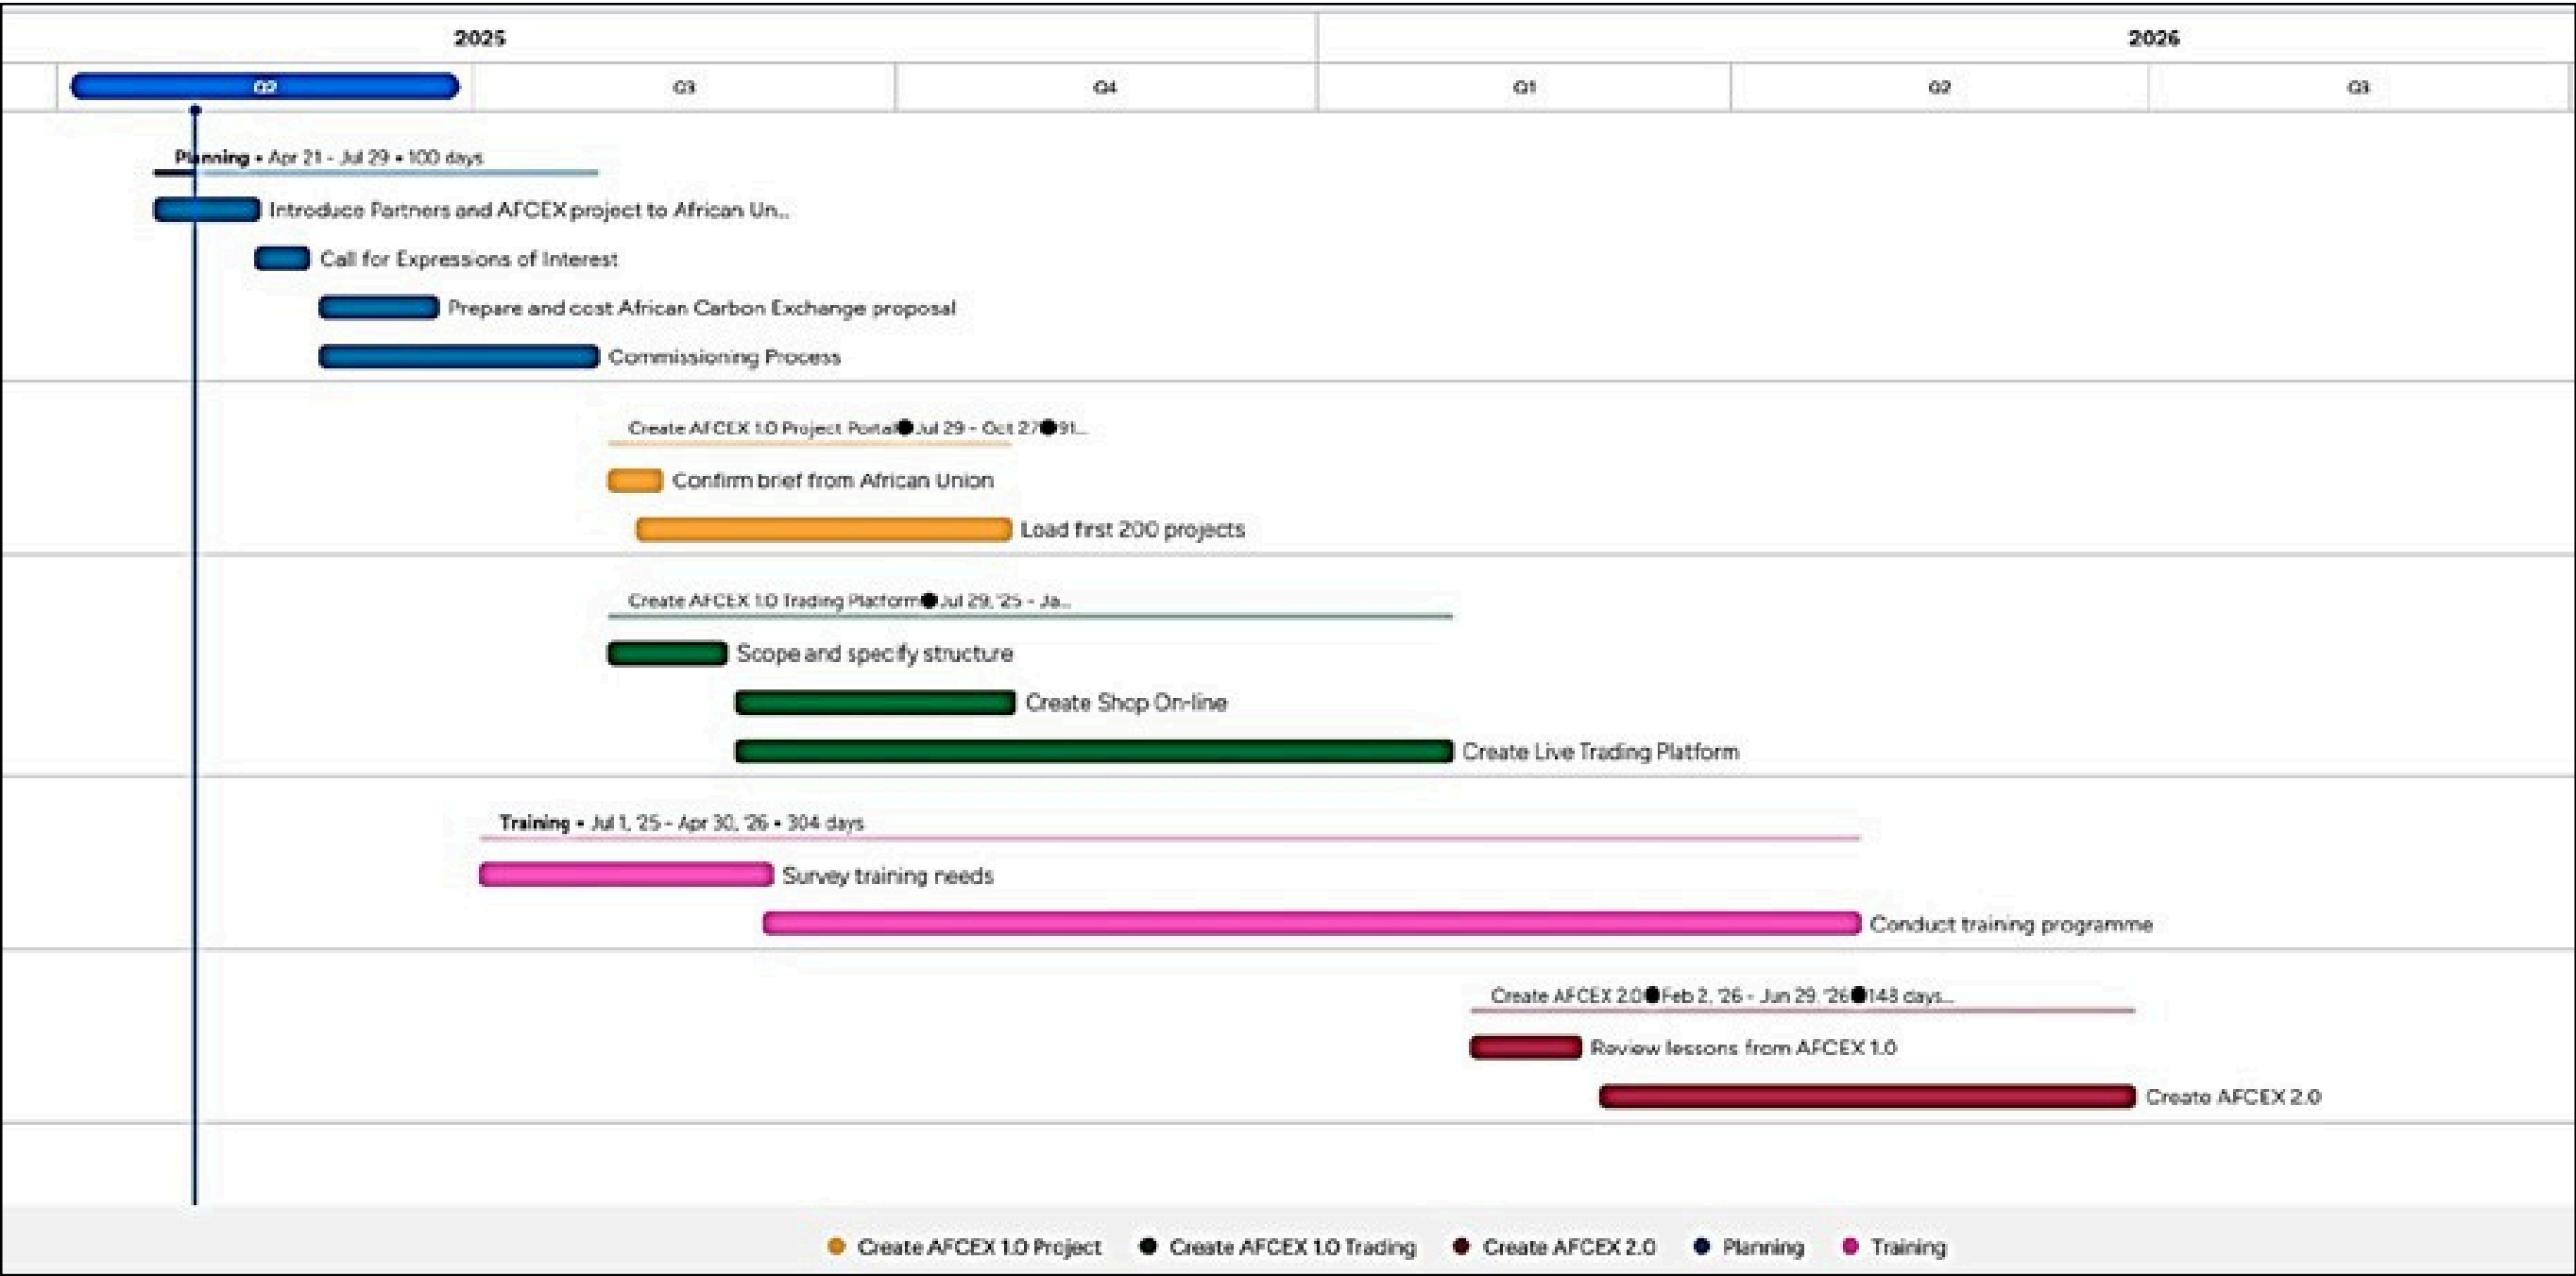

Review Annually

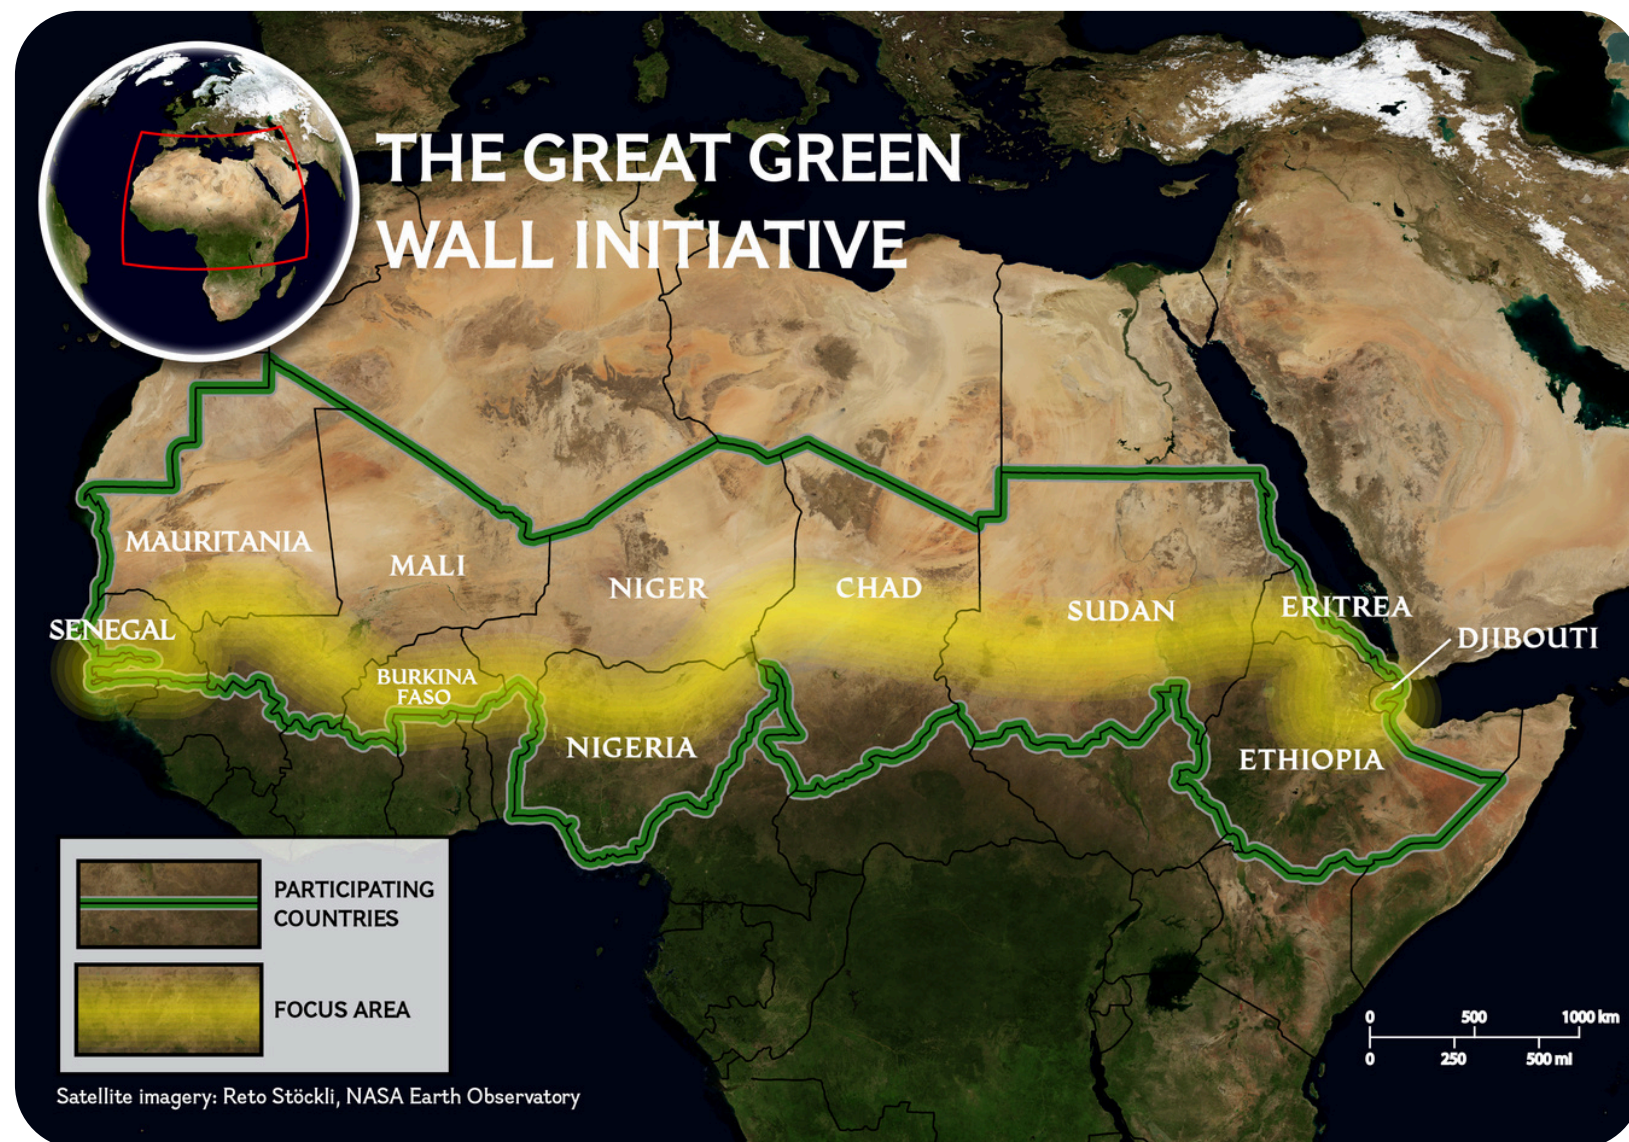

Review Training Programme at least annually and make continuous improvements guided by KPI measures and responses from trainees and communities

Indicative Deployment

(abbreviated project plan format)

Benefits for Africa

Clarity & Control

Immediate action and progress with a proven system will provide clarity and return the control of African environmental equities (biodiversity and carbon credits) to the African people

International Reputation & Reach

Rapid restoration of Africa's carbon market reputation and reach. Major influence on the global carbon market

Great Green Wall

Catalyst for further Great Green Wall development and funding

Prosperity

Target: 90% of credit income kept within Africa

Credibility

High integrity credits only

Scaling

Flexible using modular electronic platform

Expertise

World class expertise and training available

Delivery

Community control and benefits documented

SOLUTION SUMMARY

AFRICA CARBON EXCHANGE

High Integrity Credits
